

Using the Assessment CD-ROM

1

Click on *Click_PC.exe* for PC or *Click_Mac* for Mac.

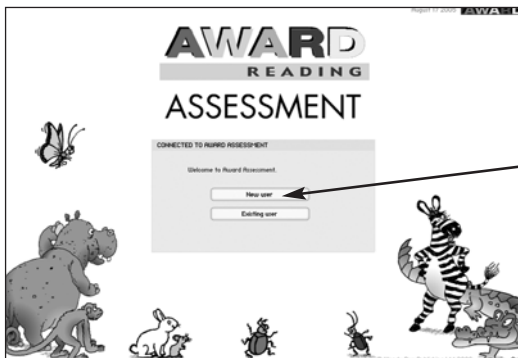

2

As the administrator will have set up the database, the teacher need only *Browse* and the software will find the correct folder.

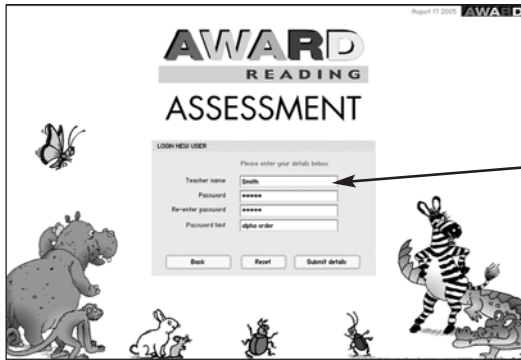

3

The teacher chooses the folder called *AWARD_Database*.

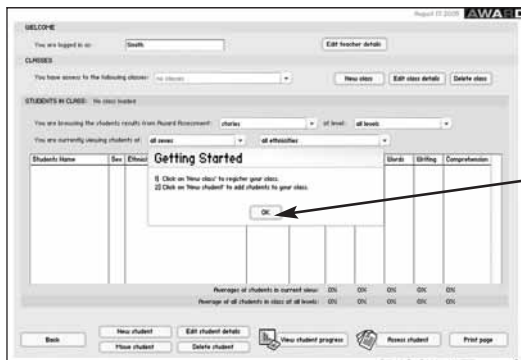

4

The teacher logs in. At the first visit, the teacher should log in as a new user.

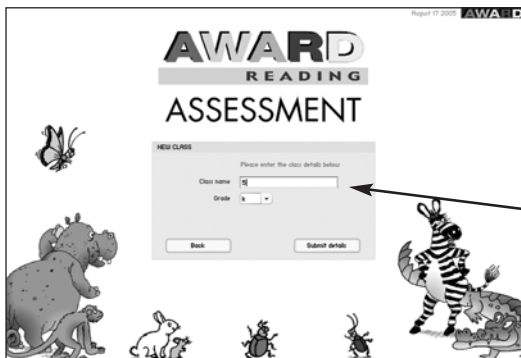

5

Insert details and log in. There is a hint for remembering a password.

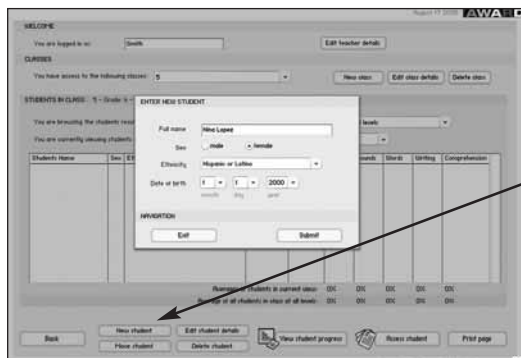

6

This is the teacher's "home page." This is where he or she can add, edit, or delete classes; select the gender/ethnicity and levels to look at; add, delete, move, or edit students; select a student and view his/her assessment history; or start a new assessment. First the teacher must add a class.

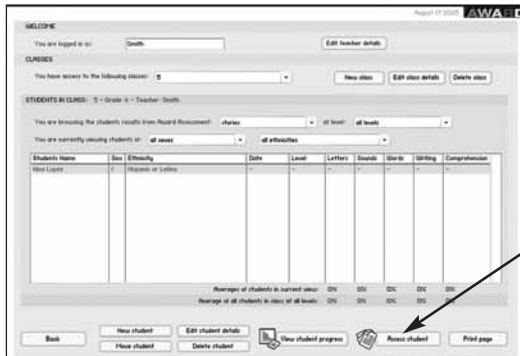

7

Add a new class.

8

To enter a new student in this class, click on *New Student* and select the categories and birth date.

9

Before a student can do an assessment, the teacher must highlight the student's name and click on *Assess student*.

10

Select the level for the student to work at. *This student is to be assessed at Magenta level.* The teacher ticks the title or category he or she wishes to assess the student at. The student works on that assessment activity on his/her own.

11

From the home page, the teacher can select *View Student Progress*. The teacher can then see the texts completed, and select the one to be scrutinized.

STUDENT PROGRESS - REPORT

This is a student's report for *At the Zoo*.

Teachers can view progress in bar chart format and print out the chart for children to take home.

The student's history at the selected level also shows the class average as a red horizontal line.
